Introduction

My motivation for writing this manuscript was not to write a book and see my name on the cover; rather, it was my way of writing a journal. The focus of this writing is the revealed truth within God's Word that was given to me, for His Word is unchanging and can bring life and life more abundantly. Whereby, our emotions and the situations that we go through are ever-changing and writing about them will produce no eternal value.

This is written as a "healing journey," not just as a book on healing. I think you will find it to be much broader in its scope than that. For I am writing this not just from academic knowledge, but as I write it, I am also going through this same journey to receive my healing. Some of the sections in this book you may not think are very relevant to the subject of healing, but they all apply. For the issues that we carry with us, whether physical or emotional, affect us as a whole person and should not be dissected into smaller components.

Just a little about me, At a early age, less than one year, I came down with a life-threatening and crippling condition that, after the smoke cleared, resulted in symptoms that looked very much like cerebral palsy (CP). Through my growing years, I overcame many of these limitations, learned how to walk and talk and afterward learned to be content and complacent with my condition. It took many years before I got to the point where I was no longer satisfied with my limited degree of healing and that is where this journey starts.

First, I wrote what I consider to be beginning mind-sets that I believe kept me from reaching my full healing at an earlier age, for I am now fifty-five years of age. The website PowerMinistries.info, where this healing journey also resides, was started about ten years ago, around the year 2000, out of an interest to learn God's Word and two years

later, I took off for a Bible college. After many years of saturating myself in God's Word, I knew it was time for my healing, not just more partial healing, enough to get by on or slow labor-intensive growth, but complete wholeness through God's Word.

As you go through these teachings, know that healing is a journey. By this, I do not mean a journey of slow physical improvement over a number of weeks, months or years. People use this as a justification, rather than to believe and receive healing solely from God's Word. However, even when physical healing comes instantaneously and overnight, it still took a process of time for us to renew our mind and get to the place where we could receive our healing. God has provided several ways within His Word to pursue healing. If one way doesn't seem to work for you pursue another way, but do not give up! I assure you that if you draw a line in the sand as to how far you will go to get your healing, our adversary will make sure that you cross that line. In many ways, it is your choice. Are you going to remain steadfast until the end, resting in the truth of God's Word and become that overcomer or are you going to give up, choose to make the best of your physical sickness or limitation and settle for second best?

The sections I have written are by no means exhaustive, there is much more to be said about each point. However, I have tried to address most mind-sets that hinders us and most ways that allows us to receive healing from God.

It is my wish that everyone reading this, no matter what their condition might be, regardless of how it came upon them or how long they have had the condition, will find their healing. That a seed will be planted and they will rise up and say, "It is time for my healing," Knowing the truth that they are a child of God and that life and health are part of the gospel. If you cling to the truth, you cannot fail. For Jesus said, "And you shall know the truth, and the truth shall make you free," [John 8:32](#). This journey will first show you the truth of God's Word and in the truth you will find your personal healing.
